

**DEPARTMENT OF ORAL & MAXILLOFACIAL
SURGERY**

Oral & Maxillofacial Surgery is a unique, challenging discipline of dentistry. This department focuses on wide range of disease involving Head, Neck, Jaw & Facial tissues. The scope of this specialty is very extensive ranging from simple extraction of teeth to management of head & Neck pathologies, Facial trauma and Esthetic facial corrections like cleft lip & palate.

The undergraduate students & Postgraduate students undergo specialized intensive clinical & surgical training in this field. Students are also trained in Major operation theatre setup & effectively interact with other allied disciplines (Like General Surgery, ENT, and Plastic Surgery & Anesthesia) to provide comprehensive care.

Basic life support & Management of medical emergencies are also taught to the students as a part of Oral and Maxillofacial Surgery curriculum.

Through clinical research, continued education department of Oral and Maxillofacial Surgery strive at collaborating with education and service to provide high level of growth and development to students, staff and our patients
