

DEPARTMENT OF PROSTHODONTICS
CROWN & BRIDGE

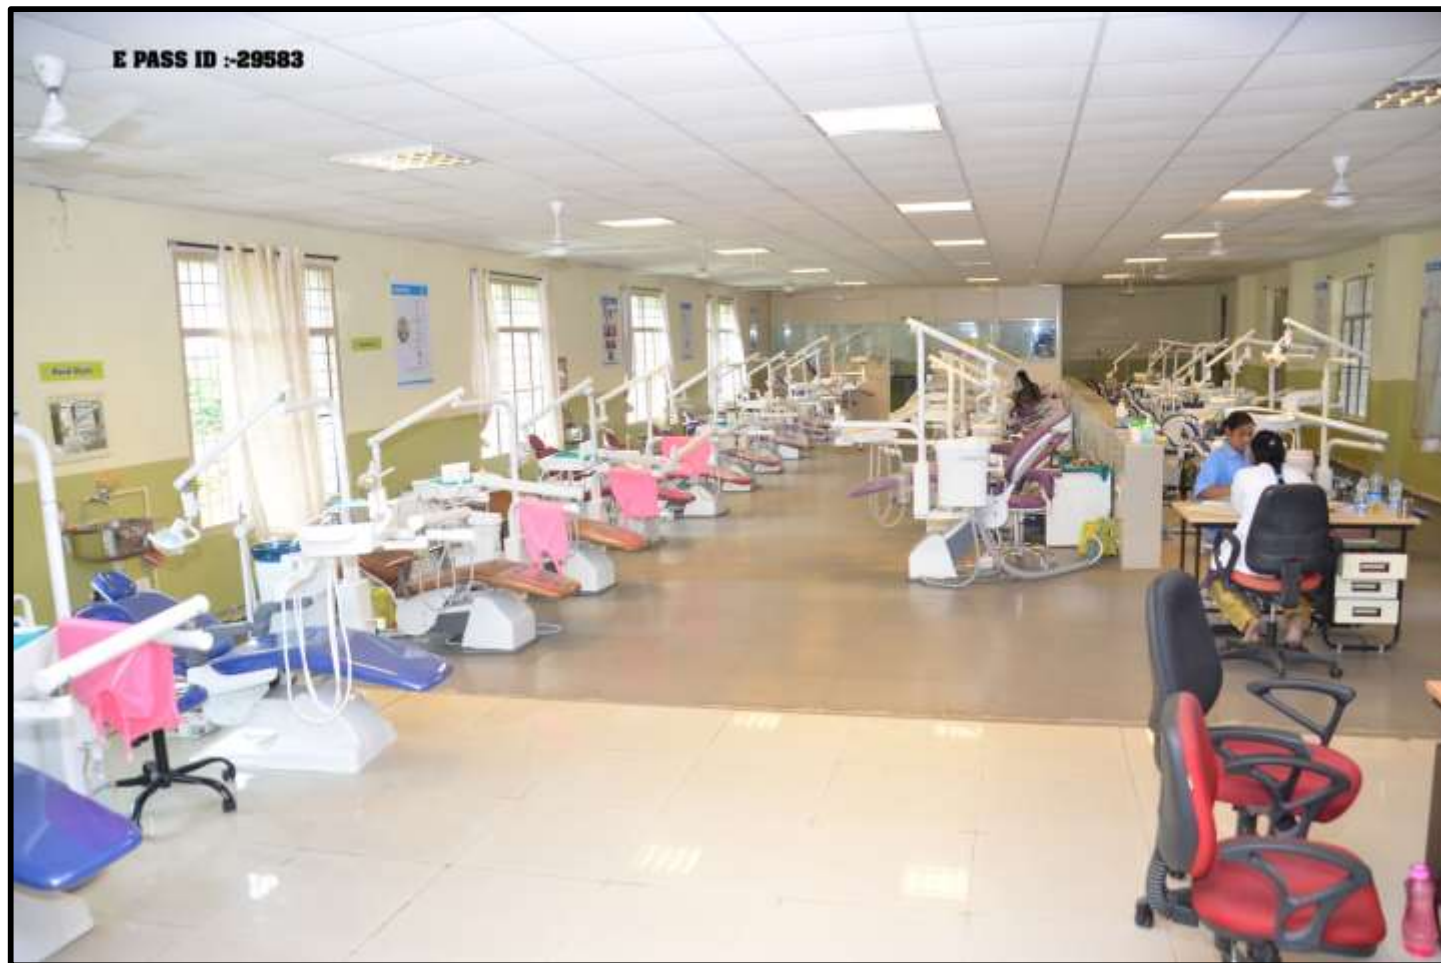

MISSION AND VISION:

- The department of Prosthodontics and crown and bridge at MRDCW offers diagnosis, treatment
- planning, rehabilitation and maintenance of the oral function, while ensuring comfort, esthetics and health of patient with clinical conditions associated with missing or deficient teeth and associated tissues. It specializes in implant, esthetics and reconstructive dentistry.
- The primary responsibility of the department lies in the education and training of students in the restorative aspect of rehabilitating missing dentition back to biologic health, function, esthetics and comfort.

PRIMARY GOALS AND OBJECTIVE:

- Provide students with information in basic science as foundation for understanding the literature and adapting future advances into the clinical practice of prosthodontics.
- Train clinical students to demonstrate proficiency with management of patient requiring prosthodontics and implant treatment as well as the long term supportive therapy of these patients.
- Train students who generate, disseminate, preserve knowledge and serve the community and profession.
- The department boasts of an implantology clinic, where a large number of special cases pertaining to implant supported fixed, removable and full mouth cases are explored. Maxillofacial prosthesis has also been taken up in great interest by the department.
- In a nutshell the department takes gratification in what is now and thrives on increasing knowledge, development and inculcating advances proposed in the field.
